### **County Executive Urges Support for Workers As GE Announces Layoffs**

Erie, PA – Earlier today GE Transportation announced plans to lay off 1,500 workers in the Erie facility in the coming months. Erie County Executive Kathy Dahlkemper has expressed serious concern for the impact this will have on the workers facing layoffs and their families.

“I am deeply concerned for the workers and their families impacted by GE’s announcement. My office is prepared to work with state and federal officials to ensure these workers are able to access the support and resources they deserve” said Dahlkemper.

Dahlkemper has been in contact with union leaders, Governor Wolf and Senator Casey and has reached out to Senator Toomey to coordinate with all involved to ensure that workers affected by these cuts are able to access necessary resources.
