	Other/ Risk not reported***	6.1	1.1	9.1	1.1
	All Pediatric****	0.0	0.0	0.8	0.8

^From beginning of epidemic (1980 for PA and Erie; 1983 for U.S.)

\*For PA, gender is reported for all age groups; For U.S., only gender for adults and adolescents is reported

Data may be incomplete due to a reporting lag; Number of cases listed in this report may vary from previous reports due to the interstate deduplication process

United States cases represent 50 states, District of Columbia, and U.S. dependent areas

\*\*Estimating cases accounts for reporting delays

\*\*\*For U.S., includes hemophilia, blood transfusion, and any other risk factor not reported or not identified

\*\*\*\*Includes adult cases which are assigned pediatric modes of transmission since infection is believed to have occurred before age 13

n/a=Not available
